

smart soundbooth

Every Great Idea Needs a Quiet Start

In today's fast-paced and open-plan work environments, finding a quiet space for focused work or private conversations can feel like searching for a needle in a haystack. Introducing our smart sound booth, an innovative acoustic solution designed to elevate your workspace experience.

Combining effective sound isolation with sleek, modern design, our smart sound booth provides privacy, productivity, and comfort. Whether you're in a busy office, a bustling hotel, or a quiet library, our smart sound booth creates a personal sanctuary that adapts to your needs.

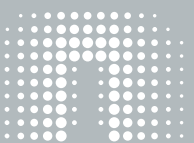

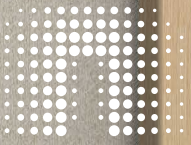

Designed for Silence and Clarity

Our smart sound booth's acoustic design ensures that your conversations remain confidential and your focus remains undisturbed. Carefully engineered with soundproofing materials, it blocks external noise, creating a quiet and private environment even in the busiest settings.

Whether you're taking an important call, brainstorming ideas, or simply need a moment of quiet, our smart sound booth provides a dedicated space where you can work without distractions. This focus-enhancing design not only boosts productivity but also helps protect sensitive conversations, making it an essential addition to any workspace.

Soothing and Peaceful Ambience

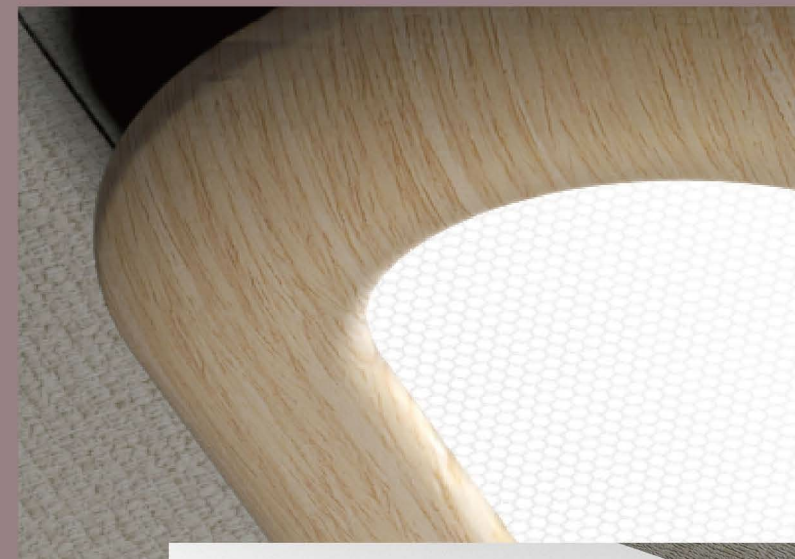

Crafted with a blend of wood-effect surfaces and soft upholstery, our smart sound booth creates a warm and inviting atmosphere that promotes relaxation and creativity. The use of calming materials and textures helps reduce stress and fosters a sense of well-being among users. This environment not only enhances productivity but also boosts employee happiness and satisfaction. By providing a space where individuals can recharge and refocus, our smart sound booth reflects a commitment to creating a supportive and caring workplace culture.

Thoughtfully Equipped for Comfort & Convenience

Our smart sound booth is equipped with adjustable ventilation, lighting, and power outlets, ensuring a comfortable and convenient experience for every user. The lighting and fan speed can be tailored to suit your preferences, whether you need bright light for focused work or a softer ambiance for relaxation. The high-quality LED lighting features a prismatic anti-glare lens, a high Color Rendering Index (CRI>90), and is flicker-free, helping to reduce eye strain and fatigue. Integrated power outlets allow you to charge devices and stay connected.

These thoughtful features make our smart sound booth a versatile and user-friendly solution for a wide range of activities, from concentrated work to virtual meetings.

Acoustic Excellence Inside and Out

Our smart sound booth is expertly designed to deliver exceptional soundproofing and audio clarity, creating an immersive, distraction-free environment. The side walls are constructed with multiple layers of materials at varying densities, effectively blocking external noise across a range of frequencies and ensuring privacy. High-performance PVB laminated glass further enhances sound insulation, acting as a barrier against unwanted disturbances.

Inside, PET acoustic felt lines the walls, reducing reverberation and providing excellent speech intelligibility.

Our smart sound booth's acoustic performance extends beyond its interior; the exterior surfaces are treated with PU acoustic foam placed beneath the fabric. This helps reduce airborne noise, improving the sound environment in the surrounding area.

Additionally, the ventilation system is specifically designed for noise reduction. Air channels minimise sound transmission in both directions, maintaining acoustic integrity while ensuring proper airflow.

Comfort & Style Spot Anywhere

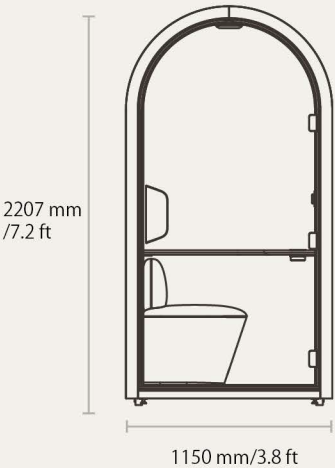

The arched roof with soft upholstery creates a warm and inviting aesthetic that complements any environment. With its modular design, our smart sound booth is easy to move and can be set up in under an hour. All components are sized for convenient transport through tight spaces, allowing deployment in a variety of settings. Whether it's a cozy corner in your home, a quiet nook in a café, or a serene spot in a hotel lounge, our smart sound booth adds a touch of sophistication while providing a peaceful retreat. Its versatile style and functional design make it an ideal choice for creating private, comfortable spaces in relaxed and personal settings.

Specification

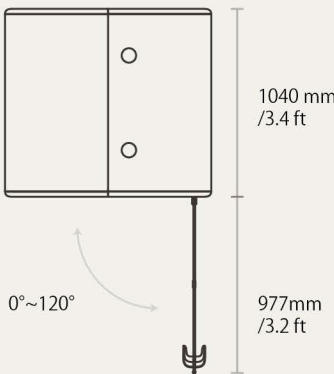

MEASUREMENTS

Exterior	H 2207 mm × W 1150 mm × D1040 mm H 7.2 ft × W 3.8 ft × D 3.4 ft
Doorway	950 mm wide / 3.1 ft wide
Ventilation Clearance	Above: 20 cm / 7,9 in Under: At least one side of the ground clearance open to surrounding air
Interior	H 2005 mm × W 970 mm × D 960 mm H 6.6 ft × W 3.2 ft × D 3.1 ft

MATERIALS

Wall	Fabric+PU acoustic foam, Curved birch plywood, PET acoustic felt, Sheet steel, Steel frame
Table	HPL on birch plywood with varnish trim
Glass	PVB laminated glass (5 + 5 mm)
Floor	Steel frame, Oriented strand board, Caster wheel, Leveling feet
Carpet	Nylon low loop pile carpet

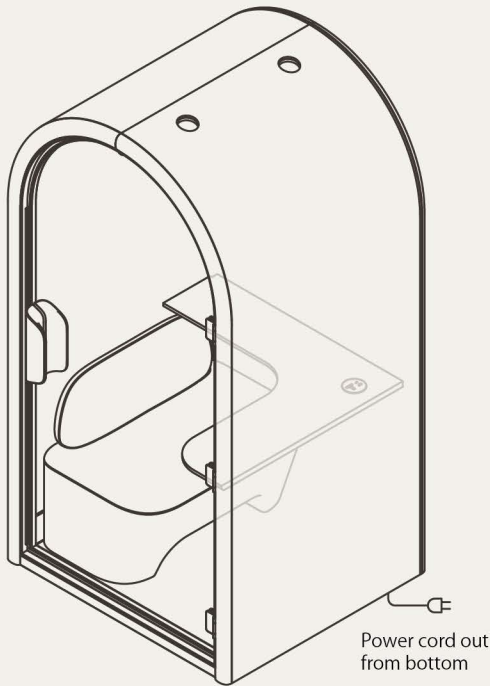

ELECTRICS

Power input	100–240 VAC, 50–60 Hz
Outlet Power Socket	VAC: 100–240 V, 50–60 Hz, 10 A maximum, USB A charger: 18 W USB C charger: 18 W
Power Consumption	6/30/60 W(Standby/Standard/Maximum) Ventilation fan 0-20W, Lighting 0-20W, PLC 1W

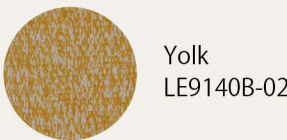

FUNCTION & PERFORMANCE

Ventilation	121 l/s, 256 CFM (436 m³/h) Auto-refresh: 5min after every 30mins at standby
Lighting	Strength 0-1800lm, Color temperature 3000-6000k adjustable, CRI >90, luminance on table top at standard >400lux, flicker-free
